EDUCATION

Aix-Marseille School of Economics (AMSE), Marseille   *2020-Present*
Master Empirical and Theoretical Economics
Master thesis: Children, marriage and sex imbalances: The impact of the two-child policy on marital outcome in China

University of Toulon   *2017-2020*
Licence Economie et Gestion - Option Economie et Finance   Mention très bien

Lycée Joffre, Montpellier   *2016-2017*
Classe Préparatoire - Physique, Chimie et Sciences de l'Ingénieur

Lycée Dumont d'Urville, Toulon   *2016*
Baccalauréat Scientifique   Mention bien

EXPERIENCES

Master thesis   *Mars 2022-Present*
***Children, marriage and sex imbalances: The impact of the two-child policy on marital outcome in China**- supervised by Habiba Djebbari and Eva Raiber*

· Do fertility plans influence the marital decision? In theory, children are part of the marital capital that individuals seek to maximise when they marry. I use variation in policy implementation of the One-Child Policy in China and its relaxation to capture the effect of the possible number of children on marriage. I find that men who brought the fewest potential children to the match are more likely to marry after the end of the One-Child Policy. I argue that this is because of an increase in women's bargaining power in the marriage market due to a skewed sex ratio. When given a choice, women choose the individual who can bring them the most children. Thus, it suggests that potential children influence marital decisions.

Research Internship   *May-July 2021*
***Effects of globalisation on the slopes of Phillips curves over time? An analysis of the G7 countries** - supervised by Gilles Dufrénot*

· The project aimed to find a new formulation for the Phillips curve taking into account the possible impact of globalisation.
· I conducted a literature review, collected and processed the data.
