AMSE Day 2022 - Team building activity
Dear readers,

2022 was the fifth year in operation for the Graduate School of Research (GSR) AMSE. We are now at halfway stage in our project, a good time for a partial review. 2022 marked the virtual end of Covid restrictions and it was back to normal face-to-face teaching for our students, naturally with due respect for all the safety guidelines. Our Master program, combining the strengths of a university (academic excellence) and of a Grande École (common perspective and close monitoring), can already be considered a success. The professional integration of our students is one of our major concerns: 12 months after graduation, we are proud to report that 98% of our students have found a job, 56% during or just after their last year internship! Many of our PhD students receive prizes for their work and most of them find positions in academia in France, Europe, the US or in international organizations like the IMF or the World Bank.

On the research side, on top of the various workshops and conferences that we regularly organize every year, we hosted our most important one, the 21st edition of the LAGV, in conjunction with the International Conference on Public Economic Theory (PET 2022) in the beautiful venue Palais du Pharo in Marseille. All the national and international participants were extremely happy to be attending the two most important international conferences on public economics! We also welcomed into our ranks one professor, Badih Ghattas, three assistant professors, Sullivan Hué, Hélène Laurent, Marco Fongoni, one CNRS researcher, Yannick Dupraz and one associate researcher, Vincent Bignon, working respectively on econometrics and big data, political economics, macroeconomics, economic history, and monetary economics. All of them are contributing to the enrichment of our research and teaching GSR program centered on a world in crises. On the outreach side, enhanced and professionalized means have been deployed to broaden the public dissemination of academic knowledge in Economics. Our bilingual review Dialogues économiques, now available both online and in print, is continuing its mission to create a bridge between our research results and the general public. Each article available on the website is also shared on the CNRS blogging platform Le Journal. Alongside the Sciences Echos conferences, aimed at presenting economics to secondary school and first-year undergraduate students, we have continued to produce educational videos enriched with animated graphics, enabling us to reach a wider audience. The increasing development of our AMSE YouTube channel complements this strategy of knowledge dissemination to a larger part of society. Our philosophy is that research and teaching should be two fundamental pillars of modern societies.

Alain Venditti
AMSE Director

Thomas Seegmuller
Tanguy van Ypersele
AMSE Deputy Directors

Graduate School of Research AMSE:
- Project Manager: A. Venditti
- From 2018/01/26 to 2028/01/25
- A*Midex: 7 030 000 Euros
- ANR: 9 632 000 Euros
Aix-Marseille School of Economics combines a research unit (UMR 7316), a graduate school, and a public outreach department.

Innovative and original, AMSE is centered on the fundamental concerns of our societies. Research and teaching are carefully combined to train a new generation of economists capable of dealing with all the challenges of a world in crisis, capable of putting their knowledge of economics to work for citizens and policy makers.

Under the EUR program, AMSE is receiving financial support for 10 years to carry out its three missions and become a center of excellence in economics in France and abroad.

Launched in 2011, AMSE brings together research and postgraduate studies in economics within AMU around a project on globalization and public policy.

The creation of AMSE enabled us to adapt to academic globalization and become a leading research center within the global community of economics departments.

AMSE brings together practically all of Aix-en-Provence and Marseille’s economists within a single research department sharing a common vision of research and training.

The AMSE School (EcAMSE) was created in 2015 as a School of Economics within the University. It has been awarded the Academy of Excellence label by A*MIDEX.

The EUR program incorporates research and training governance to implement an innovative economics department, which combines the strengths of a university (academic excellence) and a French Grande École (shared perspective, close follow-up).

WATCH the AMSE video presentation, showcasing the three pillars of our mission: research, teaching, and knowledge dissemination.

At AMSE, we strive not only to advance the frontiers of knowledge through cutting-edge research, but also to inspire and educate the next generation of leaders through exceptional teaching.

Our commitment to sharing knowledge with the broader community also ensures that our impact extends beyond the walls of academia. This video highlights the various ways in which we are working to achieve these goals, including interviews with faculty members and students, as well as footage of our facilities and classrooms.

There are many stories to share. The selection reflects the activities covered by AMSE.
Publications
In 2022, AMSE researchers published 64 articles in academic journals, 11 book chapters and 1 book. AMSE researchers also achieved a significant number of interdisciplinary publications.

A prosperous year of awards
Elie Vidal-Naquet ADRES best young paper award (ADRES, Association pour le Développement de la Recherche en Economie et en Statistique)
Alberto Prati ISQOLS one of the best dissertations (ISQOLS, International Society for Quality-of-Life Studies)
Stéphane Benveniste AFSE Economics thesis prize (AFSE, Association Française de Science Economique)
Sullivan Hué Fondation Banque de France thesis prize
Sofia Ruiz Palazuelos LAGV prize (LAGV, Journées Louis-André Gérard-Varet)
Suzanna Khalifa EconJobMarket one of the 5 best papers

Scientific visitors from all over the world
32 scientists from other universities visited AMSE, including 20 faculty and 12 PhD students. Details from page 13.

Mediterranean Worlds Forum
Organized as a follow-up to the commitments made during the 2019 Sommet des deux rives, the Mediterranean Worlds Forum was held in February 2022. Four AMSE students were selected and participated as rapporteurs responsible for summarizing the exchanges and reporting on the resulting proposals.

Developments in the program of studies
- The M2 Economic Policy Analyses track of the Master in Economics opened to apprenticeships in September.
- Two new double degrees with the Università Ca’Foscari Venezia joined the list of international programs offered at AMSE.

Recognition
Bruno Ventelou (CNRS-AMSE) was elected to the Haut Conseil de la Santé Publique, Commission spécialisée Maladies infectieuses et maladies émergentes.

Dialogues Economiques
Key figures: 21 new articles, 21 researchers and 10 journalists involved.
More than 76000 cumulative views (CNRS website and dedicated website) with a 33% increase in views on the dedicated website. The most-read article in 2022 was “Separation and divorce: what effect do they have on the social advancement of children?”, by Hélène Le Forner and Nina Le Clerre with 2940 views.

Hackathon
The M2 EBDS track students took part in a hackathon organized by Airbus Helicopters. A team of AMSE students won, beating the Airbus team and other teams of students; the Airbus management team participated in the award ceremony held in April 2022.
AMSE community

Each year new talents join our international team of researchers, post-doctoral fellows, PhD students and staff.

Nationalities of members
Researchers, Post-Doc, PhD and staff

Women and men
Researchers, Post-Doc, PhD and staff

Researchers by institutions
89 researchers

We welcomed:
- 1 professor: Badih Ghattas,
- 1 researcher: Yannick Dupraz,
- 1 associated researcher: Vincent Bignon,
- 3 assistant professors: Marco Fongoni, Sullivan Huê, Hélène Laurent.

58 researchers at Aix-Marseille University:
21 assistant professors/tenure tracks, 34 professors, 1 associated professor from Banque de France, 2 emeritus professors.

15 researchers at CNRS:
5 junior researchers, 8 senior researchers, 2 emeritus professors.

4 researchers at Centrale Marseille:
1 assistant professor, 3 professors.

2 researchers at EHESS:
1 assistant professor, 1 professor.

2 researchers at Kedge Business School:
2 associate professors.

1 researcher at McGill University:
1 professor.

1 researcher at University of Toulon:
1 assistant professor.

4 researchers at Sciences Po Aix:
2 assistant professors, 2 professors.

1 researcher at University of Montpellier:
1 assistant professor.

1 researcher at Rennes School of Business:
1 professor.

The complete list of AMSE researchers is available in the appendices, page 52.

62 doctoral students

At the start of the 2022/2023 academic year, we welcomed 12 new doctoral students:

Ulrich AIOUNOU - Advisors: Gilles DUFRÉNOT and Emmanuel FLACHAIRE
Bakhtawar ALI - Advisors: Marc SANGNIER and Avner SEROR
Aliénor BISANTS - Advisors: Yann BRAMOULLÉ and Roberta ZIPO
Laura Daniela CONTRERAS PORTELA - Advisors: Lorenzo ROTUNNO and Federico TRIONFETTI
Tom GARGANI - Advisor: Nicolas GRAVEL
Lucie GIORGI - Advisors: Habiba DJEBBARI and Eva RAIBER
Ricardo GUZMAN - Advisors: Lorenzo ROTUNNO and Federico TRIONFETTI
Nastasia HENRY - Advisors: Céline GIMET and Alain VENDITTI
Natalia Andrea LABRADOR BERNATE - Advisor: Habiba DJEBBARI
Antoine LACOMBE - Advisors: Sylvie BOYER and Bruno VENTELOU
Maria SAKHAROVA - Advisors: Cecilia GARCIA-PÉÑALOSA
Matteo SANTANGELO RAVA - Advisors: Habiba DJEBBARI ("On the Job" PhD track)

And 3 new 4th year PhD fellowship students:

Samuel DELPEUCH (PhD Sciences Po) - AMSE tutor: Tanguy van YPERSELE
Morten STØSTAD (PhD Paris School of Economics) - AMSE tutor: Mathieu LEFEBVRE
Eddy ZANOUTENE (PhD Université Paris II Panthéon-Assas) - AMSE tutor: Alain TRANNOY

The complete list of AMSE doctoral students is available in the appendices, page 58.

22 agents

They are employed in 7 departments:
Administration - Isabelle Mauduech
Finance - Anne-Sophie Leclercq Therond
Communication - Elisabeth Barthélémy
Sharing - Léa Dispa
IT - Patrice Cacciuttolo
Studies - Elisabeth Barthélémy
Data bases and surveys - Laurence Bouvard
16 post-doctoral fellows

At the start of the 2022/2023 academic year, we welcomed 3 new post-doctoral fellows:
Despoina BALOUKTSI - PhD from Goethe University Frankfurt
Francesco Saverio GAUDIO - PhD from University of Warwick
Ismaïl RAFAÏ - PhD from Université Côte d’Azur

The complete list of AMSE post-doctoral fellows is available in the appendices, page 63.

PhD visiting and mobility

AMSE strongly encourages PhD students to visit other universities: 7 PhD students visited another university for long periods in 2022 (more than 2 months). 12 PhD students from other universities visited AMSE.

More information on visiting and mobility is available in the appendices, page 64.

Scientific honors

Bruno Ventelou (CNRS-AMSE) was elected to the Haut Conseil de la Santé Publique, Commission spécialisée Maladies infectieuses et maladies émergentes.

Awards

Elie Vidal-Naquet ADRES best young paper award (ADRES, Association pour le Développement de la Recherche en Economie et en Statistique)
Alberto Prati ISQOLS one of the best dissertations (ISQOLS, International Society for Quality-of-Life Studies)
Stéphane Benveniste AFSE Economics thesis prize (AFSE, Association Française de Science Economique)
Sullivan Hué Fondation Banque de France thesis prize
Sofia Ruiz Palazuelos LAGV prize (LAGV, Journées Louis-André Gérard-Varet)
Suzanna Khalifa EconJobMarket one of the 5 best papers
Visitors' highlights

The Visiting Researcher programme enables us to welcome foreign lecturers and researchers renowned for their expertise in their field.

AMSE visitors come from the “four corner” of the globe!

Vera Eichenauer is a postdoctoral researcher at the Swiss Economic Institute KOF at ETH Zurich in Switzerland. Her ongoing research projects study the motives and effects of screening foreign direct investments, the politics of reforms, fiscal federalism during Covid-19, and population sorting as consequence of regional autonomy.

Aurélia Lépine is an Associate Professor in Health Economics at University College London in the Institute for Global Health and a UKRI Future Leaders Fellow. She studies the health behaviours of vulnerable women in low-income countries and encompass several areas of global health (HIV/AIDS, nutrition, family planning and mental health).
Yulin Hswen is an Assistant Professor at the University of California San Francisco. She studies the application of behavioral economic theories to enhance the acceptance and adherence of healthy behaviors and the willingness to share private data. Her work captures unfiltered conversations on online networks to further understand the connections between social experiences and health.

Fabio Cerina is Associate Professor in Economic Policy at the Dipartimento di Scienze Economiche e Aziendali of the University of Cagliari and researcher at the Center for North South Economic Research. He studies Macroeconomics, Spatial Economics and Political Economy.

João Carlos de Oliveira Souza is an Assistant Professor at the Federal University of Piauí. His research focuses on optimization, ranging from nonlinear analysis to practical applications. His interest lies in theoretical and algorithmic aspects of optimization in Riemannian manifolds, theory of monotone operators, multiobjective optimization, equilibrium problems and convex analysis.

Federico Revelli is a Professor of Public Economics at the University of Turin and fellow of CESifo. In his research he empirically investigates the spatial features of decision-making processes in multilevel fiscal structures (local elections, tax interdependence, yardstick competition) and their consequences on a number of dimensions of decentralized government performance.

Mr Mihir BHATTACHARYA is an Assistant Professor of Economics in Ashoka University. His research focuses on social choice theory, decision theory and political economy, specifically the existence of constitutionally consistent voting rules, and representatively consistent voting rules which are immune to manipulative partitioning of voters by political parties.

Garance Genicot is a Professor at the Department of Economics of Georgetown University. She uses microeconomic tools to study key issues in development economics such as aspirations, informal credit and insurance markets, intra-household bargaining, social networks, tolerance and inequality.
Morgan Raux is a postdoctoral researcher at the department of economics and management at the University of Luxembourg. His research focuses on recruitment issues with a micro applied perspective.

Donald Davis is the Ragnar Nurkse professor of economics at Columbia University. His research ranges over international trade, economic geography, regional and urban economics. He is a Research Associate at the National Bureau of Economic Research and a past president of the Urban Economics Association.

Rajeev Dehejia is professor of public policy and professor of economics at New York University. He is affiliated with the National Bureau of Economic Research, the Institute for the Study of Labor Economics (IZA), and CESifo.

Sanjeev Goyal is Arthur Pigou professor of economics and fellow of Christ’s College at the University of Cambridge and visiting professor at NYU Abu Dhabi. He is a pioneer and a leading international researcher in the economics of networks.

Catherine Guirkinger is professor of economics in the Center for Research in Economic Development (CRED) at the University of Namur. Her main field is development economics and my main area of research is the economics of households and extended families, particularly in Africa.

Olivier L’Haridon is Professor of Economics at University of Rennes (France) and senior fellow (2021-2026) of Institut Universitaire de France. His main research field focuses on behavior under risk and ambiguity. He is also interested in labor economics and bargaining.
Fanny Henriet is a CNRS researcher and professor at Paris School of Economics. Her research focuses on energy transition and its implication on fossil fuel resources and stranded assets. She also studies the properties of climate policies and their acceptability.

Jakob Madsen is a macroeconomist at the department of economics of UWA and a fellow of the Australian Academy of Social Sciences. He studies macroeconomics, endogenous and unified economic growth, the macroeconomics of inequality, history of economic growth, and applied econometrics.

Sultan Mehmoood is a professor of economics at the New Economic School in Moscow and lead researcher at the World Bank’s DE JURE Program. His research interests are in development economics and political economy.

Harutaka Takahashi is a research fellow at the Graduate School of Economics at Kobe University, and professor emeritus at Meiji Gakuin University. His recent research interests include the application of econometrics to the analysis of the Covid-19 pandemic.

Joël Cariolle is a research fellow at Ferdi. He holds a PhD in economics from the Cerdi- Université Clermont Auvergne, which he obtained in 2013. His research focuses on digital issues for sub-Saharan Africa and other developing regions, regional integration in French-speaking Africa, economic vulnerability and corruption in developing and developed countries.
Portrait

Joan CANTON  
Member of Thierry Breton’s Cabinet at the European Commission

Joan Canton completed his thesis in 2007 in environmental economics, under the supervision of Hubert Stahn and Antoine Soubeyran. Today, he works at the European Commission as a member of Thierry Breton’s Cabinet.

Can you describe your professional trajectory since your time at Amse?

I did my thesis under the supervision of Hubert Stahn and Antoine Soubeyran between 2004 and 2007. The topic was «eco-industries: an imperfect competition approach». In 2006, I had the chance to go to Montreal to work with Bernard Sinclair-Desgagné and a team of researchers who were also involved in environmental economics. I wound up staying there because I met my wife.

At the end of my thesis, in 2007, I was hired as an assistant professor at the University of Ottawa. But I only stayed there for two years. In the meantime, I had studied for the entrance exams for the European Commission, and passed them. I chose the European civil service and moved to Brussels.

The European Commission is organized in Directorates-General. I started in the Directorate-General for Economic and Financial Affairs. My work was analytical, I wrote scientific papers on energy, environment and climate policies, and their macro and microeconomic consequences for Member States.

Three years later, I moved to a more political position in the Directorate-General for Climate Action. I was closely involved in the European strategy for adaptation to climate change that was adopted in 2013. Then I moved to the Directorate General for Energy, in the economic analysis unit. I collaborated with modelers on the economic transformation needed to achieve our energy or climate «targets» - like the greenhouse gas reduction target, or the renewable energy target for energy consumption. It was an applied research position. It was interesting. I was helping others to prepare their legislative or policy initiatives, but it was far removed from the core business, from politics.

Moving to the Secretariat General transformed my career. It gave me the opportunity to approach the political sphere much more closely. I joined under the presidency of Von der Leyen, in a coordinating role - in particular on the European Green Deal, for which I contributed to the initial document.

What are you working on currently?

For the last two years I’ve been a member of Commissioner Thierry Breton’s cabinet. His portfolio, entitled ‘Internal Market’, is broad. It covers industrial policy, digital policy, and defense and space policy. Within this framework, I follow the industrial policy aspects, particularly in sectors subject to the energy and climate transition, such as the automotive industry, heavy industry, chemicals, and hydrogen. These major sectors are targeted by concrete proposals such as emission standards for cars, the reform of legislation on chemicals or legislative action to promote the circular economy. It’s a job involving political negotiation.
My days are often very long and shaped by the Commissioner’s agenda. There are many meetings: those where the Commissioner tests his political ideas, those where the Commissioner’s ideas are translated into legislative proposals, those where messages from the units are ‘deciphered’ and passed on to the Commissioner. I also accompany the Commissioner on field visits, to factories, to meet ministers and members of national parliaments. I work on concrete things, on arbitration, on political negotiations. I may not get to make the decisions, but I provide support.

HOW DO YOU FEEL ABOUT YOUR TIME AT AMSE?

Doing a thesis and teaching within the French research system can lead on to many things. Take me, now working in the European civil service and with no regrets about having done a thesis. What I learned during my studies at GREQAM still helps me to frame my thinking. Even though I no longer do any research, I still have a scientific approach to things. Teaching also gave me excellent training: there is no better exercise in public speaking than having to interest 40 first-year university students! And of course, there are also the subjects. My research topics have followed me throughout my career. My thesis was on eco-industries, i.e. all the industries that produce the environmental goods and services needed to, in today’s jargon, «decarbonize» the economy, to move towards a circular economy. I have never stopped focusing on these topics. In my current office, you’ll find books that I used during my thesis and that I still lend out from time to time. The environmental economics issues under debate when I was doing my thesis remain valid today in terms of environmental, climate or energy policies.
We study the causes and consequences of the current crises, in particular the economic, migration, environmental and health crises. Our aim is to help rethink public intervention in a world in crisis, as well as the joint regulation of these different spheres with a focus on the Mediterranean region.
In 2022, AMSE researchers published 64 articles in academic journals of economics, 11 book chapters, 1 book, and 5 reports. AMSE researchers achieved also a significant rate of interdisciplinary publications.

25 other articles were published in other disciplines such as health, mathematics, and medicine.

The quality of these publications can be judged according to the CNRS economics committee ranking of economics journals. In 2022, AMSE researchers published 27 articles in journals ranked 1* and 1, 22 articles in journals ranked 2, 11 articles in journals ranked 3-4, and 2 articles in unranked journals.

The complete list of publications is available in the appendices, from page 67.

85 publications, including articles written or cowritten by AMSE PhD students.

Trannoy, A.; Wasmer, E.
Le Grand retour de la terre dans les patrimoines: Et pourquoi c’est une bonne nouvelle!
Paris: Odile Jacob, 2022

In this book, the authors explain why urban land has become considerably more valuable over the last thirty years, and propose a fiscal revolution that would reconcile social justice and economic efficiency.
Articles published in 2022 in Economics top ranking journals

AMSE researchers publish articles mainly in the economics literature, but not only. They also publish in high quality journals referring to other disciplines.

**Social psychology**

Social Sciences, Sociology

Political science

Understanding how children develop is a fundamental challenge for academic research in many disciplines, from medicine to economics. Since the pioneering works of James J. Heckman and co-authors in the early 2000s, a vibrant economic literature on child development has emerged. Through estimations of the technology of skill formation, economists working in this field demonstrated that gaps in child development reflect large differences in parents' investment in their children. They also showed that parents profoundly affect children’s personality and other skills not captured by cognitive abilities. Undoubtedly, these findings have enabled social scientists to better understand how children develop, and policy makers to design public policies that foster human development.

Focused on the technology of skill formation, however, the economic approach to child development says little about the interactions through which parents shape children’s multiple skills. This appeared to me as an important gap in the economic literature. I started to investigate this issue during my PhD at the Paris School of Economics, around 2016. As often in my research, I began with readings well beyond the (usual) scope of economics: Anna Freud, Donald Winnicott, and John Bowlby. Although their views of child development differ on several important points, they all describe the incredibly powerful link that parents and children develop. A link that emerges from care, and that literally becomes the backbone of a child’s emerging identity. In the words of François Mauriac, which I used to open the paper: “We are, all of us, molded and remolded by those who have loved us, and though that love may pass, we remain none the less their work” (The Desert of Love, 1949).

**Paper’s contributions**

In the paper, I introduce a theoretical model of how parent-child interactions impact child development. My approach is rooted in developmental psychology. It is based on the idea, first introduced by John Bowlby, that through care, sensitivity, and positive feedback, a parent enables her child to build mental representations of himself as loved and competent. These mental representations shape the child’s noncognitive skills by increasing his motivation to learn and explore his surroundings. Hence, the parent’s interactions with the child create a fundamental complementarity in the formation of cognitive and noncognitive skills. As the child learns from the parent, he forms cognitive skills while acquiring noncognitive skills that increase his motivation to further learn.

This model explains the evidence from a vast literature, at the same time generating new insights. First, the model provides a single unifying explanation for well-known properties of the production function of skills. It is well established that (a) skills are self-productive, (b) noncognitive skills foster cognitive skills, and (c) there is a dynamic complementarity between early and later investments. All these properties can be explained by the mechanism of the model.

---

**Research program**

**Child Development in Parent-Child Interactions**

*Avner Seror, Journal of Political Economy, vol 130 (9), 2462-2499, 2022*

**Avner Seror** is an assistant professor at AMSE since 2019. He received his Ph.D in economics from the Paris School of Economics in March 2018 under the supervision of Thierry Verdier, and was a research associate at Chapman University in 2018-2019. His work focuses on identity, religion, institutions, and political economy.
Beyond the established properties of the production function of skills, I show that a child who increases his noncognitive skills by interacting with his parent is better equipped to learn from his surroundings. This prediction echoes the celebrated first experiments that enabled generations of psychologists to classify different types of parent-child relationships, depending on children’s observed behavior. Indeed, a child’s exploration of his surroundings while his parent is absent reflects a secure attachment to the parent, which is built through the parent’s care, sensitivity, and positive feedback. Conversely, limited exploration reflects a parent-child relationship where the child is insecurely attached to the parent.

I also use this model to study the effect of early exposure to the media devices that are ubiquitous in most economies. There is a growing consensus that early media exposure is negatively associated with a variety of child outcomes. This negative association is not straightforward, since media devices (e.g. smartphones and tablets) stimulate children and can often foster substantial learning through game apps or educational content. Additionally, children growing up in more disadvantaged families appear to be particularly exposed to media devices. The model provides an intuitive explanation for these phenomena. First, I find that parents expose their children to media devices as a substitute for their own caring effort. The more a child is exposed to media devices, the less effort he puts into learning from the parent. Thus, he is less able to see himself as competent and loved, he acquires less noncognitive skills, and he becomes less motivated to further learn from his surroundings. Second, according to the model, a parent’s caring effort is less likely to be replaced by early exposure to media devices when the parent has “better” characteristics, which implies that such exposure can amplify child development inequalities.

**Future research**

I see at least two potentially interesting avenues for future research. The first is related to causal estimates of the effect of early exposure to media devices on various measures of child development. To my knowledge, little attempt has been made to explore this issue, although there is a consensus in the medical literature that early media exposure is negatively associated with child development outcomes. As long as we lack rigorous evidence, we will remain unable to provide clear guidelines for policy makers or to estimate the cost of early media exposure on a variety of societal outcomes.

Second, this theory is grounded in the attachment theory, which enabled generations of psychologists and psychiatrists to study the complex linkage between children’s mental health and parent-child relationships. It could also serve as a starting point for quantitative analysis of the socio-economic determinants of parent-child relationships and early childhood mental health.
Urbanisation and technological progress are closely linked. Economic historians and development economists have widely documented how workers are drawn to cities from the traditional sector in order to profit from the modern technologies that are created and adopted there. Models of long-run growth thus tend to see urbanisation as a consequence of economic growth. Yet a vast literature on economic geography maintains that urbanisation itself generates productivity gains. Going back to Marshall, economists have explored the idea that high density in cities results in learning – and thus in both skill upgrading and innovation. This suggests that agglomeration can cause economic growth through its impact on technological change.

Our analysis seeks to examine the two-way relationship that can emerge between urbanisation and innovation, in order to understand how they interacted at the onset of modern economic growth. Our interest in this question is motivated by a somewhat surprising stylized fact: that Western Europe was unusually urbanised before the Industrial Revolution. Many historians regard China as the most technologically advanced country in the Middle Ages. However, despite an early upsurge in the share of the population living in cities during the early modern period, already exhibiting an urbanisation rate of 5% by 1700, more than twice that prevailing in China, as shown in Figure 1.

Within Europe, the UK had the highest urbanisation rate. It had started to rise well before the First Industrial Revolution, tripling from 6 to 18% between 1600 and 1750, the latter date usually being considered the starting point of the Industrial Revolution. Examining the population in the four largest cities in England, Scotland and Ireland, we find that the UK experienced an urban growth spurt before 1750. Whilst the English population increased by 14%, the population of major cities, notably Liverpool, Manchester, Dublin, Glasgow and Edinburgh, doubled or tripled in size in the first half of the 18th century. Such timing raises the question of the extent to which urbanisation was a cause – rather than a consequence – of economic growth.

Our paper develops a model of growth consistent with the idea that urbanisation precedes industrialisation. First, we argue that the economy consists of two sectors: agriculture in rural areas and manufacturing in cities. Manufacturing is assumed to be a traditional artisan activity rather than factory-based, without the use of physical capital and with a worker’s productivity depending only on the number of ideas that he holds. As the average number of ideas available grows, manufacturing productivity increases
and the incentive to leave the countryside rises, leading to higher manufacturing employment.

Second, we also consider how ideas are created and transmitted. Transmission between agents occurs through imitation: individuals in cities may acquire an idea by meeting someone who already possesses it. A novel idea is created through observing the ideas of others, thus endogenously inventing new ways of production. In either case, idea acquisition results from meetings between individuals; and, following Marshall, we suppose that the number of meetings is an increasing function of urban density. Under these assumptions, urbanisation becomes the determinant of manufacturing productivity.

The feedback mechanism between city size and technology generates a novel set of growth dynamics. A shock to urbanisation results in knowledge creation and diffusion, higher manufacturing productivity and a flow of labour into manufacturing (and thus cities). The resulting higher urban density further increases manufacturing productivity, setting off a process of sustained growth. Our model hence makes urbanisation – as opposed to industrialization – the key element in a theory of development. Figure 2 reports the evolution of urbanisation and output in the model (continuous lines), as well as those observed in the actual data (dots). The trigger for the growth process is an exogenous shock to agricultural productivity that shifts labour into manufacturing, increasing urban density and thus raising productivity. The shock can hence create a virtuous circle, in which urbanisation and productivity keep increasing. Note that the model reproduces the acceleration in urbanization and in output that we see in the data.

These accelerations are the result of the microfounded process of knowledge generation that we postulate, which allows us to dissociate the creation of ideas from their diffusion. Ideas are invented by an individual and then transmitted to the next generation through imitation. As a result, innovations will increase productivity only slowly, as imitation by subsequent generations occurs. Thus, a key contribution of our work is that our model simultaneously delivers fast technological change and slow overall productivity growth in manufacturing, in line with existing estimates for Britain in the 18th and 19th centuries.
Quetelet, in the 19th century, had already identified the social science puzzle of a high degree of variance of crime rates across space. Recent studies suggest that this variance is not the result of observed or unobserved geographic attributes. Seeking to explain it, existing studies have so far focused on strategic complementarity between individuals engaging in criminal activities. We highlight a novel mechanism through which social interactions affect criminal outcomes. Households invest more in protection when their neighbors also invest in protection. This implies that private decisions have a social multiplier effect.

The paper presents four facts about victimization and protection investments based on detailed data from Canada’s General Social Survey (GSS). Victimization is measured by the share of the surveyed population who experienced a break-and-enter crime in their house during the year preceding the interview.

(i) Victimization and household income are uncorrelated or slightly positively correlated. Victimization is roughly the same for households below and above the median household income.
(ii) Rich neighborhoods are victimized less than poor ones. The yearly mean victimization rate is about 3.4%, and neighborhoods below the median income experience victimization rates 35% higher than neighborhoods above the median income.
(iii) Conditional on neighborhood income, rich households are victimized more than poor ones.
(iv) Both rich households and rich neighborhoods invest more in protection. The percentage of households equipped with an alarm is about 30-35% higher among households above the median income than among households below the median income.

Basically, rich neighborhoods are less victimized but within a given neighborhood, it is the rich that are more victimized. Rich households and rich neighborhoods invest more in protection. To explain these facts, we provide a theory that builds on the strategic complementarity between criminal search effort and household investment in protection. There is a city composed of two neighborhoods, one rich and one poor. The supply of criminals is exogenous at city level, but arbitrage ensures that the returns on crime are equalized at the neighborhood level. Criminals also choose whether to pay a search cost to compare different households within the same neighborhood or simply to pick one randomly. Meanwhile, households invest in private protection to reduce losses from break-ins.

The two main mechanisms of the model are as follows. First, the criminals’ search implies that...
households make heterogeneous protection investments. Households who expect to be compared with each other invest in protection to divert criminals’ attention toward their neighbors. Second, protection heterogeneity motivates the criminals’ search. Thus, there is strategic complementarity between criminals’ search efforts and households’ protection investments. Protection heterogeneity derives from the fact that protection is a positional good. Households make utility gains by being ranked higher in the distribution of protection investment. To see this, suppose that all households in a given neighborhood make the same protection investment, while some of the criminals pay the search cost to compare two randomly chosen households. Now, consider the case where two of the households are scrutinized by a given criminal. As they are alike, the probability of being broken into is one half for each of them. If one of these households were to invest more, the probability of being broken into would drop to zero and the marginal increase in effort would generate a mass gain. Therefore, similar agents make heterogeneous investments in equilibrium. Further, this argument implies that the distribution of protection investment has no mass point. Our model can generate equilibrium outcomes in line with the above set of facts. In the absence of protection investment, the rich neighborhood is more attractive to criminals. However, its residents also invest more in protection, which deters criminals. Indeed, criminals in the rich neighborhood are more willing to pay the search cost than those in the poor neighborhood. Thus, rich households expect to be frequently compared with their neighbors. This affects both the mean (people invest more on average) and the dispersion of protection investments (there are still some people who choose not to invest, while others invest more). That the rich neighborhood invests more in protection implies low returns on crime, and therefore, criminals may be more attracted to the poor neighborhood. Meanwhile, rich households are victimized more than poorer ones in each neighborhood. This equilibrium allocation is illustrated by a parameterization broadly replicating the quantitative facts outlined above. Importantly, the starting point of our analysis is that criminals are mobile between different neighborhoods of the same city. Everyone knows whether a neighborhood is wealthy or not, and criminals respond to incentives when deciding where to break in. In this light, the strength of our theory is its ability to predict the geography of crime despite criminals being mobile. A large set of evidence suggests that crimes are most often committed near the criminal’s home, while criminals are more likely to be from lower-income families (see, e.g., Burnett & Tonkin, 2020). This is, in fact, compatible with our theory. The actual assumption we need is that criminals are sufficiently mobile between neighborhoods so that the return on crime is the same across neighborhoods. In our model, if, as is likely, more criminals reside in the poor neighborhood, then we can predict that most crime will occur near the criminals’ homes. Further research Our model can be enriched in a variety of ways. First, we assume that the number of criminals is exogenous at city level. This number could increase with the return on crime, and such an extension would allow us to study the impact of public policies aimed at reducing overall property crime. Second, we suppose that all agents are risk-neutral, whereas risk aversion is undoubtedly a key driver of protection investment. We could therefore study the resulting demand for insurance. Third, protection reduces losses inflicted on households by criminals. In addition, it could increase their probability of being caught. Fourth, we abstract from households’ residential choices. These should respond to the geography of property crime. Lastly, we make extensive use of Canadian evidence. It would be interesting to know whether similar facts hold in the US or in Europe.
Scientific events

AMSE events bring together economists from around the world to share research and disseminate science. The conferences we organize offer an overview of different areas of economics and show how research is providing new insights into central questions.

Conferences/Workshops

8 international events were organized at AMSE in 2022. More than 900 people attended these events, which included:

Journées Louis André Géraard Varet LAGV 2022
- Date: June 6-8, 2022
- Number of participants: 274
- Website: https://lagv2022.sciencesconf.org/

Launched in 2002, one year after the premature death of the great scientist whose name they bear, the journées Louis-André Gérard-Varet (LAGV) aim to stimulate the production and dissemination of quality research in public economics. The focus is on results that contribute significantly to informing public debate and/or decision-making, the direction taken by the research community at the Aix-Marseille School of Economics (AMSE).

Keynote speakers:
Myrna WOODERS, Vanderbilt University, College of Arts and Science
Rabah AMIR, University of Iowa, Tippie College of Business
Marc FLEURBAEY, Paris School of Economics, CNRS

International Conference on Public Economic Theory
PET 2022
- Date: June 8-10, 2022
- Number of participants: 286
- Website: https://pet2022.sciencesconf.org/

The Association for Public Economic Theory (APET) is dedicated to promoting theoretical research in all areas of public finance and facilitating communication among economists working in these fields. The PET conference aims to host presentations covering all fields of public economics, primarily theoretical rather than applied. Research findings are presented on topics such as behavioral economics, experimental economics, mechanism design, theoretical public economics, game theory, public decision-making, etc.

Keynote speaker:
Glenn C. LOURY, Brown University

Semi-plenaries speakers:
Helmut CREMER, Toulouse School of Economics
Hulya ERASLAN, Rice University
François FORGES, Université Paris-Dauphine
Sanjeev GOYAL, University of Cambridge
Nikos NIKIFORAKIS, New York University Abu Dhabi
Karine NYBORG, University of Oslo
Edward SCHLEE, Arizona State University
Xavier VIVES, University of Navarra, IESE Business School
Quantitative Finance and Financial Econometrics  
QFFE 2022  
International Conference and Spring School  
- Date: June 14-17, 2022  
- Number of participants: 120 participants  
- Website: https://qffe2022.sciencesconf.org/

Keynote speakers:  
Torben G. ANDERSEN, Northwestern University  
Peter R. HANSEN, University of North Carolina

Guest speakers:  
Christian BROWNLEES, Universitat Pompeu Fabra  
Roberto RENÒ, University of Verona

Spring school lecturers:  
Christian BROWNLEES, Universitat Pompeu Fabra  
Peter R. HANSEN, University of North Carolina

Seminars  
123 seminars were held at AMSE in 2022.

2022 saw the launch of two new seminars:  
- The Macro and Labor Economics Seminar organized once a month, a researcher in this topic being invited to make a presentation and interact with other researchers.  
- The French-Japanese webinar organized once a month to strengthen the links between researchers in economics from French and Japanese universities and research institutions.

Details on the seminars are available in the appendices, from page 75.

Detailed information of the events are available in the appendices, from page 82.
Grants

In 2022, AMSE researchers were the principal investigators or lead scientists in projects: 17 funded by the Agence Nationale de la Recherche (ANR) and 4 supported by other French and European fundings. In 2022, AMSE received a special donation from the Fondation Banque de France.

Agence Nationale de la Recherche

Famille et inégalité
Lead scientist: E. Flachaire
From 2016/10/01 to 2023/04/30
Amount: 47 520 €
Researchers involved in the project: A. Trannoy, A. Pacifico

La mesure des inégalités ordinales et multidimensionnelles
Lead scientist: N. Gravel
From 2016/10/01 to 2022/09/30
Amount: 118 000 €
Researchers involved in the project: S. Bazen, M. Faure, E. Flachaire, A. Trannoy

Economie du logement et évaluations de politiques publiques
Lead scientist: A. Trannoy
From 2017/09/01 to 2023/06/30
Amount: 161 977 €

Terrorism, Radicalization and Government Policy in MENA
Lead scientist: C. Muller
From 2017/10/01 to 2023/04/30
Amount: 409 774 €

The Impact of Childhood Circumstances on Individual Outcomes of the Life-Course
Lead scientist: A. Trannoy
From 2018/10/01 to 2021/08/31
Amount: 150 000 €

Job Complementarities in Employment: Consequences for Minorities
Lead scientist: C. Garcia-Penalosa
From 2018/10/01 to 2023/03/31
Amount: 151 718 €
Researchers involved in the project: T. van Ypersele, E. Galvan

Gestion du risque sur les réseaux
Lead scientist: F. Deroiàn
From 2018/10/01 to 2024/03/31
Amount: 306 779 €
Researchers involved in the project: M. Belhaj, S. Bervoets, U. Bolletta, R. Bourlès, H. Djebbari, C. Figuières, D. Henriët, C. Muller

Classes moyennes, fiscalité et démocratie dans un monde globalisé
Lead scientist: A. Trannoy
From 2019/10/01 to 2024/03/31
Amount: 19 440 €
**Extraction durable de métaux de valeur dans les résidus de bauxite**  
Lead scientist: D. Ami  
From 2020/10/01 to 2025/02/28  
Amount: 161,633 €  
Researcher involved in the project: F. Rychen

**Dynamique des inégalités au cours de la vie**  
Lead scientist: E. Flachaire  
From 2020/01/01 to 2023/04/30  
Amount: 300,525 €  
Researcher involved in the project: C. Schluter

**Resilience-after-crisis in risk, time and social preferences: a behavioral economics study with a focus on cooperativeness**  
Lead scientist: B. Ventelou  
From 2021/05/01 to 2022/04/30  
Amount: 75,040 €

**Prise de décision en période d’incertitude**  
Lead scientist: C. Poilly  
From 2021/01/01 to 2024/12/31  
Amount: 206,292 €

**Machine Learning et Econométrie pour la Mesure des Risques en Finance**  
Lead scientist: S. Laurent  
From 2021/12/01 to 2025/05/31  
Amount: 95,200 €

**Changement technologique dans l’ère du COVID-19 : l’impact sur les conditions travail et la satisfaction au travail**  
Lead scientist: E. Moreno Galbis  
From 2021/12/01 to 2025/05/31  
Amount: 129,248 €  
Researcher involved in the project: L. Rotunno

**Leveraging medical records to identify patients at risk of neurodegenerative disease**  
Lead scientist: B. Ventelou  
From 2021/12/01 to 2024/11/30  
Amount: 172,984 €

**Fragmentation financière et inégalités dans la zone euro**  
Lead scientist: C. Gimet  
From 2022/02/01 to 2026/01/31  
Amount: 346,441 €

**Prosocial behaviour: a tale of two images**  
Lead scientist: S. Luchini  
From 2022/06/30 to 2026/06/30  
Amount: 24,080 €

**Fondation Banque de France**  
AMSE received a donation of 928,196.74 € from the Fondation Banque de France. Fondation Banque de France is Bank of France’s sponsor for research. It acts as a catalyst for research, focusing on relevant policy issues and implementing competitive selection processes.

**Other French and European fundings**

**Caractérisation des épisodes de pollution et évaluation des mesures mises**  
Primequal  
Lead scientist: O. Chanel  
From 2018/08/28 to 2022/08/27  
Amount: 8,300 €

**Raréfaction de l’offre de soins et adaptations des médecins généralistes**  
Institut de Recherche en Santé Publique  
Lead scientist: B. Ventelou  
From 2019/12/01 to 2022/10/31  
Amount: 28,800 €  
Researchers involved in the project: S. Bazen, A. Paraponaris, A. Zaytseva

**Accompagnons le Véhicule Electrique avec la Nécessaire Intelligence de la Recharge**  
ADEME  
Lead scientist: F. Rychen  
From 2019/01/01 to 2023/01/01  
Amount: 465,986 €  
Researchers involved in the project: D. Ami, F. Aprahamian, S. Luchini

**EUROMOD**  
Lead scientist: A. Trannoy  
From 2021/02/17 to 2022/12/31  
Amount: 23,344 €
We observe with pride what our students have become. We are delighted with each one of their successes. They tell us how their training has been useful to them. This year, I get the message that the ability they have developed to learn and to be open to new things as they enter the business world is almost as important as the stock of knowledge they acquired during their university course.

Tanguy van YPERSELE
AMSE graduate school director
EcAMSE is a department of the Faculty of Economics and Management within Aix-Marseille University.

Training-Research link

Training and research are intrinsically linked at AMSE. The teaching is fed by research and some of the students are involved in the scientific output of the unit through their thesis work. This inter-relationship allows students to benefit from an academic environment that encourages scientific excellence and from teaching enriched by recent and original research work.

The training-research link begins with the initial training of students at the AMSE School and registered in the Magistère or in the Master’s degrees. From the first year of the Magistère to the second year of the Master’s, some students do scientific internships in the research unit. This daily experience of scientific work helps them understand its richness and its challenges.

The various courses offered under the master’s programme are currently in the process of being certified under the TIGER plan of Aix-Marseille University. TIGER certifies that the teaching is based on research and that the students are introduced to the scientific approach from the beginning of their course. This initiation takes the form, in the first year of the master’s programme, of a set of courses guiding students through a scientific project. Since the start of the 2018 academic year, AMSE has been offering the Theoretical and Empirical Economics track in the second year of the master’s programme, leading to the AMSE PhD programme.

The training-research link is further reflected in AMSE researchers’ involvement in teaching through their pedagogic responsibilities within the Magistère and the Master’s degrees, the Data Science DESU and the PhD programme, the school’s study programmes.

Another concrete example of the training-research link is the innovative exchange programme created in partnership with the Autonomous University of Madrid (UAM) that is, as AMU, a member of the CIVIS alliance. A few students from the M1 Economics and UAM Master’s research programmes participate in a two-week exchange that gives them experience in international research work.

A first three AMSE students participated in this programme in 2021 and two others in November 2022, Elad Passi and Julie Rabenandrasana. Our two students were supervised by Rocío Sanchez-Mangas, Associate Professor at the UAM Department of Quantitative Economics. She says that «Julie and Elad integrated very well into the activities with their colleagues from UAM, who will be hosted in June 2023 in France, and with the rest of the students of the Master».

Rocio Sanchez-Mangas, in charge of academic activities, explains that the students participated in training-research activities in two different fields. On the one side, throughout the week, they attended sessions and actively worked on Impact evaluation methods with microdata, where «they had the opportunity to analyse a specific policy implemented in Spain: a remedial education programme aimed at improving the performance (in a wide sense, both cognitive and non-cognitive skills) of students with difficulties, from poor socioeconomic backgrounds. The AMSE students joined the two selected UAM exchange students for sessions with a specific focus on a particular impact evaluation method:
propensity score matching. They had access to real data and, after reviewing the main theoretical concepts and the intuition behind the method, the students worked together with real data and the software Stata to put into practice how an evaluation can be done. I think all four students learned from these sessions and enjoyed them!”. Julie Rabenandrasana adds «through the courses we attended, we were able to learn more about evaluation methods in econometrics. On a personal level, it was a great experience to see how courses are held in another university and to learn more about the Spanish culture».

On the other side, to complete their week of introduction to international research, the students were invited to attend a research seminar of financial econometrics: “Commodity Hedging: Traditional or Selective?” The speaker was a top researcher in her area (Ana María Fuertes, Professor of Finance and Econometrics, Bayes Business School, City, University of London)” reports Rocío Sanchez-Mangas.

Elad Passi says «Madrid was a great experience; we learned and enjoyed every single moment. I enjoyed collaborating with Madrid’s students and professors. One great thing was their seminar, which motivated me even more than before to participate in research and to continue in this track. Personally, Professor Sanchez-Mangas hosted us in the best possible way, accompanied us from our accommodation to the university, introduced us to delicious traditional Spanish food and more. We are grateful for the opportunity and available to help in any related future projects and to give guidance to next year’s candidates if needed».

Training through and in research enables students to pose a problem, analyse results and learn to discuss them. While the strong link between training and research is certainly an apprenticeship for becoming a researcher, the skills acquired are also needed and appreciated just as much in companies, valuable for the many students entering the professional sector.

**CIVIS, a European Civic University**

The CIVIS alliance is one of the very first initiatives seeking to create «European universities» selected and funded by the European Commission under the Erasmus+ programme. CIVIS is a collaborative space for teaching, research, innovation and the opening up of higher education to society.

Are involved in the CIVIS alliance:

- Aix-Marseille University (France)
- National and Kapodistrian University of Athens (Greece)
- University of Bucharest (Romania)
- Free University of Brussels (Belgium)
- Autonomous University of Madrid (Spain)
- Sapienza University of Rome (Italy)
- University of Stockholm (Sweden)
- Eberhard Karls University of Tübingen (Germany)
- University of Glasgow (Scotland) as an associate partner since December 2020
- University of Salzburg (Austria).

Time-frame for 1st post master job

The professional integration of our students is one of our major concerns. Average entry into the labor market for the graduating classes of 2018 to 2021:

- Immediate hiring (during or after the internship) 1%
- Job 3 months or less after graduation 1%
- Job in 3-6 months 12%
- Job in 6-12 months 10%
- Job in 12-18 months 20%
- Job search 56%

Information gathered from surveys conducted among our alumni. Average participation rate in surveys: 79.75 %

Students numbers

160 students in the MA in Economics

At the start of the 2022/2023 academic year, 160 students were registered in the MA Economics: 65 in first year and 95 in second year.

14 M2 students were in the research track Empirical and theoretical economics and the rest in the three other M2 tracks: Economic policy analysis, Quantitative finance and insurance, and Econometrics-big data-statistics.

88 students in the Magistère ingénieur économiste

At the start of the 2022/2023 academic year, 88 students were registered in this program: 36 in first year, 24 in second year and 28 in third year. Second and third-year students are also registered in the Master Economics.

Overall 41.8% of our MA and Magistère students were international in 2022, coming from around the world.

Program developments

Apprenticeship

Double degree

Two new international degree partnerships were signed with Ca’ Foscari University in Venice: one exclusively in Data Science, involving the Econometrics-Big-Data-Statistics track only, and the second in quantitative economics involving the other M2 tracks of the Master Economics. AMSE students now have the option of:
- A double degree with the University of Konstanz
- A double degree with the University of Tubingen
- A double degree with Catolica Lisbon
- Two double degrees with Ca’ Foscari
- A dual degree agreement signed with the University of Kent will come into effect in September 2023.
Career Day

The AMSE career day is a key event. It gives students the chance to meet economists, frequently alumni, to gain insights from them, and to learn about the different career possibilities open to an economist.

Key figures of the 2022 career day
133 participants at the plenary session
19 alumni oral testimonials at the plenary session
with 30 participating companies

At the Career Day, alumni present their academic and professional paths to students.

Watch the videos on YouTube
https://www.youtube.com/c/amsechannel

Meetings with professionals and alumni, face to face and distance internship interviews
PhD program

In 2022, the PhD program continued expanding and restructuring its curriculum, with a number of courses relying on both internal and visiting faculty. Courses are now organized in three modules: “topics in economics” – advanced courses in economics –, “Methods” – courses in advanced applied methods, with a focus on big data –, and “Professionalization” – courses providing PhD candidates with practical training in job-market oriented skills (presenting skills, academic practices, etc.). These modules are supplemented by reading groups where PhD students present and discuss recent frontier research.

Mobility resumed in 2022 and the AMSE PhD program once again sent students on research visits to top international universities in Europe and the US (for instance Bocconi University, University Pompeu Fabra, or Stanford University).

The AMSE PhD Program continued its one-year fellowships for external PhD candidates close to completion. Three PhD candidates from the Paris School of Economics, Sciences Po, and Paris Assas spent the academic year on the AMSE premises, completing their theses and interacting with the AMSE PhD students and faculty.

The PhD placement officers also continued to prepare candidates for the French and international job markets, organizing training sessions, mock interviews, and mock seminars. They provided additional support to PhD (and postdoctoral) candidates by monitoring their progress and contacting potential recruiters.

Starting from 2021, we have recorded and posted on the AMSE website short videos of job-market papers, to draw increased attention to AMSE job-market candidates. PhD candidates secured academic positions in France, the UK, Luxembourg, positions in international organizations such as the IMF, the European Commission, or Banque de France, and private sector jobs as economists, data scientists or statisticians.
3rd AMSE Summer school
"The Economics of Growth"

The AMSE Summer School 2022 covered recent theories and empirical approaches designed by economists to study the determinants and the implications of economic growth.

Economic growth determines the well-being of billions of people. Identifying the determinants of a country’s rate of economic growth and appreciating its implications is thus of paramount importance to understand the development trajectories of nations. The aggregate growth of an economy interacts with the decisions of individuals (e.g., to invest in education), firms (e.g., to innovate), and with government policies. What’s more, the historical, cultural, and institutional backgrounds of a country also influence growth and how it interacts with and responds to decisions by economic agents. The past three decades have witnessed major steps in our understanding of what aspects lead to or prevent sustained economic growth and what the consequences are. Economists propose rich models and novel empirical approaches that depart from simply considering capital accumulation and focus on a variety of aspects including the degree of competition, political institutions, income inequality, and climate change.

During the three days of the Summer School, students had rigorous and in-depth exposure to the most recent theories and empirical methods in the economics of growth.

Lectures were given by leading experts in the field:
- **Cecilia García-Peñalosa** (CNRS, EHESS, AMSE),
- **Philippe Aghion** (Collège de France and London School of Economics),
- **Stelios Michalopoulos** (Brown University),
- **Raouf Boucekkine** (Aix-Marseille University, AMSE and Rennes School of Business).
The main objective for 2022 was to establish a collaboration with an external provider in order to professionalize our AMSE YouTube channel. The editorial policy was redesigned, and graphic processes were improved. We are now offering high quality videos. The AMSE community is steadily expanding, as well as our audience.
Our means of public outreach have been enhanced and professionalized, so as to disseminate academic knowledge in Economics to a wider audience.

Dialogues Economiques

*Dialogues économiques*, the online media edited by AMSE, is continuing its mission to create a bridge between research in economics and the general public. Each article is published on Dialogues économiques website and shared on the CNRS blogging platform Le Journal.

Since its launch in 2019, 94 articles have been published in both French and English, 84 scientific authors have taken part in the project, and it has received a total of 250 000 page views.

Source: Aggregated data from [www.dialogues économiques.fr](http://www.dialogues economiques.fr) and [www.lejournal.cnrs.fr/nos-blogs/dialogues-economiques](http://www.lejournal.cnrs.fr/nos-blogs/dialogues-economiques)

The 2nd book, compiling the 2021 articles, has been released.

Video Tanguy van Ypersele.
2022 Key figures

21 articles published
6 videos interviews
21 scientific authors
10 scientific journalists
94 000 page-views

Most-read articles on www.dialogueséconomiques.fr

« Séparation et divorce : quels effets sur la réussite sociale des enfants ? » by Hélène Le Forner and Nina Le Clerre - February 2022: 2940 views

Sciences Echos

In 2022, the Sciences Echos conferences, aimed at presenting economics to secondary school and first-year undergraduate students, went back to face-to-face presentations in the auditorium of Bibliothèque l’Alcazar in Marseille. In 2022, 457 students attended the 4 conferences:

- «Faire de l’économie dans le système de santé ?» by Bruno Ventelou, March 1st 2022
- «La causalité n’existe pas ?», by Rusell Davidson, March 22nd 2022
- «Intérêt général, intérêts particuliers et démocratie», by Charles Figuières, October 11th 2022
- «Les villes vertes sont-elles un mythe ?» by Elisa Dienesch, November 8th 2022

Alongside these conferences, we have continued to produce educational videos enriched with animated graphics, enabling us to reach a wider audience. In 2022, we produced 4 new Sciences Echos videos obtaining 7530 cumulative views since 2021.
Science culture events

In 2022, AMSE members took part in major science culture events.

In September 2022, at the Festival Allez-Savoir 2022 organized by EHESS, Miriam Teschl led a discussion panel: "Comment mesurer les accélérations et décélérations des phénomènes en incertitude?" with Joël Guiot, Michèle Leclerc-Olive and Michaël Schwarzinger.

In September 2022, during the event La Nuit européenne des chercheurs, organized by Aix-Marseille Université, Nicolas Gravel played a part in the "Fake News Office".

In October 2022, at the Fête de la science 2022, organized by the French Ministry of Higher Education, Research and Innovation, Frédéric Dufourt, Céline Poilly and Miriam Teschl participated in a press operation answering children’s questions. These answers were published in the newspaper La Marseillaise.

[#DisMoiPourquoi] C’est quoi l’inflation et est-ce que c’est grave? by Frédéric Dufourt
Social media

Twitter - In line with previous results, AMSE posted 238 tweets and reached a total of 1100 subscribers in 2022, with wide coverage of the research community.

LinkedIn - AMSE expanded its presence on social media by opening an official LinkedIn account and reached a total of 1075 subscribers, 14% from abroad.

Media presence

2022 Key figures
32 Interviews
12 Op-Eds
24 Citations: over the year, AMSE members appeared 68 times in French or worldwide newspapers (Le Monde, Les Echos, La Libre, France Info, RFI, etc.).

Researchers (89)

Mohammad ABU-ZAINEH
Professor - Aix-Marseille University, Faculty of Medical and Paramedical Sciences
Research themes: Econometrics, Health economics, Public economics
PhD: 2008, Aix-Marseille University
Editorial activities: Editorial Member of the Arab Family Health and Population

Pedro H. ALBUQUERQUE
Associate professor - KEDGE Business School
Research themes: Development economics, Econometrics, Environmental economics
PhD: 2001, University of Wisconsin–Madison
Editorial activities: Book reviewer for South-Western/Thomson Learning, McGraw-Hill

Marcel ALOY
Assistant professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Econometrics, Macroeconomics

Dominique AMI
Assistant professor - Aix-Marseille University, Faculty of Science
Research themes: Behavioral and experimental economics, Environmental economics, Public economics
PhD: 1991, Aix-Marseille University

Frédéric APRAHAMIAN
Assistant professor - University of Toulon
Research themes: Behavioral and experimental economics, Econometrics, Environmental economics
PhD: 1991, Aix-Marseille University

Dominique AUGEY
Professor - Aix-Marseille University, Faculty of Law and Political Science
Research themes: Economic philosophy, Public economics
PhD: 1995, Aix-Marseille University

Patricia AUGIER
Professor - Aix-Marseille University, University Institute of Technology of Aix-Marseille
Research themes: Development economics, International economics and economic geography
PhD: 1995, Aix-Marseille University

Stephen BAZEN
Professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Econometrics, Labour economics, Social choice
PhD: 1988, London School of Economics
Editorial activities: Associate editor of Economics Bulletin

Mohamed BELHAIJ
Professor - Centrale Marseille
Research themes: Finance, Game theory and social networks
PhD: 2005, University of Toulouse 1

Nicolas BERMAN
Research professor - CNRS
Research themes: Development economics, International economics and economic geography
PhD: 2008, University Paris 1 Panthéon-Sorbonne
Editorial activities: Associate editor of European Economic Review, Review of International Economics

Sebastian BERVOETS
Research fellow - CNRS
Research themes: Game theory and social networks, Social choice
PhD: 2005, Aix-Marseille University

Vincent BIGNON
Associate professor - Banque de France
Research themes: Finance
PhD: 2002, École Polytechnique

Raouf BOUCEKKINE
Professor - Rennes School of Business
Research themes: Development economics, Macroeconomics
PhD: 1993, University Paris 1 Panthéon-Sorbonne
Renaud BOURLÈS
Professor - Centrale Marseille
Research themes: Finance, Game theory and social networks
PhD: 2008, Aix-Marseille University

Yann BRAMOULLÉ
Research professor - CNRS
AMSE scientific director
Research themes: Environmental economics, Game theory and social networks
PhD: 2002, University of Maryland
Editorial activities: Coeditor of the Oxford Handbook of the Economics of Networks, Associate editor at the American Economic Review

Olivier CHANEL
Research professor - CNRS
Research themes: Econometrics, Environmental economics, Health economics
PhD: 1993, École des hautes études en sciences sociales
Editorial activities: On the editorial council for Revue Française d’Economie, Associate editor of Environment and Development Economics

Nicolas CLOOTENS
Assistant professor - Centrale Marseille
Research themes: Environmental economics, Macroeconomics
PhD: 2017, University of Orléans

Jernej COPIC
Tenure track - CNRS
Research themes: Finance
PhD: 2006, California Institute of Technology

Russell DAVIDSON
Professor - McGill University
Research themes: Econometrics, Social choice
PhD: 1977, University of British Columbia

Bruno DECREUSE
Professor - Aix-Marseille University, Faculty of Economics and Management
Dean of the Faculty of Economics and Management
Research themes: Labour economics, Macroeconomics
PhD: 2000, Aix-Marseille University

Timothée DEMONT
Assistant professor - Aix-Marseille University, Faculty of Arts, Letters, Languages and Humanities
Placement officer
Research themes: Development economics, Finance
PhD: 2012, University of Namur

Frédéric DEROİAN
Research professor - CNRS
AMSE recruiting manager
Research themes: Game theory and social networks
PhD: 2000, Aix-Marseille University

Elisa DIENESCH
Assistant professor - Sciences Po Aix
Research themes: Environmental economics, International economics and economic geography
PhD: 2013, University of Pau

Habiba DJEBBARI
Professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Development economics, Econometrics
PhD: 2004, University of Maryland

Marion DOVIS
Professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Development economics
PhD: 2007, Aix-Marseille University

Frédéric DUFORT
Professor - Aix-Marseille University, Faculty of Economics and Management
AMSE financial director
Research themes: Macroeconomics
PhD: 2001, University Paris 1 Panthéon-Sorbonne

Gilles DUFRÉNOT
Professor - Sciences Po Aix
Research themes: Development economics, Econometrics, Macroeconomics
PhD: 1995, University of Paris 12

Yannick DUPRAZ
Research fellow - CNRS
Research themes: Development economics, Labour economics
PhD: 2016, Paris School of Economics
Alice FABRE
Assistant professor - Aix-Marseille University, Faculty of Arts, Letters, Languages and Humanities
Research themes: Development economics, Macroeconomics

Mathieu FAURE
Assistant professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Game theory and social networks
PhD: 2002, University of Marne-la-Vallée

Romain FERRALI
Assistant professor - Aix-Marseille University, Faculty of Economics and Management
Placement officer
Research themes: Development economics, Game theory and social networks
PhD: 2018, Princeton University

Nathalie FERRIÈRE
Assistant professor - Sciences Po Aix
Research themes: Development economics
PhD: 2016, Paris School of Economics (EHESS)

Charles FIGUIÈRES
Professor - Aix-Marseille University, Faculty of Economics and Management
Director of the Sharing department
Research themes: Environmental economics, Game theory and social networks, Public economics
PhD: 1999, Aix-Marseille University
Editorial activities: Chief editor of Dialogues économiques, Academic editor PLOS ONE, Scientific editor for Frontiers in Environmental Economics

Emmanuel FLACHAIRE
Professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Econometrics
PhD: 1998, Aix-Marseille University

Marco FONGONI
Assistant professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Behavioral and experimental economics, Macroeconomics
PhD: 2017, University of Strathclyde

Gaëtan FOURNIER
Assistant professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Game theory and social networks
PhD: 2015, University Paris 1 Panthéon-Sorbonne

Ewen GALLIC
Assistant professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Econometrics, Environmental economics
PhD: 2017, University of Rennes 1

Cecilia GARCIA-PEÑALOSA
Research professor - CNRS-EHESS
AMSE PhD program manager
Research themes: Development economics, Labour economics, Macroeconomics
PhD: 1995, University of Oxford
Editorial activities: Associate editor of Journal of Economic Inequality

Pierre GARELLO
Professor - Aix-Marseille University, Faculty of Law and Political Science
Research themes: Economic philosophy, Public economics, Social choice
PhD: 1992, New York University
Editorial activities: Associate editor for the Journal of Private Enterprise

Karine GENTE
Professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Macroeconomics
PhD: 2001, Aix-Marseille University

Antoine GENTIER
Professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Finance, Public economics
PhD: 2001, University Paris-Dauphine
Editorial activities: Assistant editor for the Journal des Economistes et des Etudes Humaines (JEEH)

Badih GHATTAS
Professor - Aix-Marseille University, Faculty of Economics and Management
PhD: 2000, Université de la Méditerranée
Céline GIMET  
Professor - Sciences Po Aix  
Research themes: Development economics, Finance, Macroeconomics  
PhD: 2006, Aix-Marseille University  
Editorial activities: Associate editor of International Review of Financial Analysis, Research in International Business and Finance and Member of the editorial board of Panoeconomicus

Eric GIRARDIN  
Professor - Aix-Marseille University, Faculty of Economics and Management  
Research themes: Econometrics, Finance, Macroeconomics  
PhD: 1988, University of Rennes I

Pierre GRANIER  
Professor - Aix-Marseille University, Faculty of Economics and Management  
Research themes: Labour economics

Nicolas GRAVEL  
Professor - Aix-Marseille University, Faculty of Economics and Management  
Research themes: Economic philosophy, Public economics, Social choice  
PhD: 1993, University of British Columbia

Philippe GRILL  
Assistant professor - Aix-Marseille University, Faculty of Economics and Management  
Research themes: Economic philosophy  
PhD: 1984, Aix-Marseille University

Julien HANOTEAU  
Associate professor - KEDGE Business School  
Research themes: Development economics, Environmental economics  
PhD: 2004, Institut d’Études Politiques de Paris

Dominique HENRIET  
Emeritus professor - Centrale Marseille  
Research themes: Finance, Health economics, Public economics  
PhD: 1985, University Paris-Dauphine

Sullivan HUÉ  
Assistant professor - Aix-Marseille University, Faculty of Economics and Management  
Research themes: Econometrics, Finance  
PhD: 2020, Laboratoire d’Economie d’Orléans

Feriel KANDIL  
Assistant professor - Aix-Marseille University, Faculty of Economics and Management  
Research themes: Economic philosophy, Social choice  
PhD: 2001, University of Paris-Nanterre

Hélène LAURENT  
Assistant professor - Aix-Marseille University, Faculty of Economics and Management  
Research themes: Public economics  
PhD: 2018, University of Namur

Sébastien LAURENT  
Professor - Aix-Marseille University, Aix Graduate School of Management  
Research themes: Econometrics, Finance  
PhD: 2002, Maastricht University  

Didier LAUSSEL  
Emeritus professor - Aix-Marseille University, Faculty of Economics and Management  
Research themes: Industrial organization, International economics and economic geography, Public economics  
PhD: 1974, University of Grenoble 2  
Editorial activities: Associate editor of Journal of Public Economic Theory

Christelle LECOURT  
Professor - Aix-Marseille University, Faculty of Economics and Management  
Research themes: Finance  
PhD: 2000, University of Lille 1  
Editorial activities: Associate editor of the Journal Empirical Economics

Mathieu LEFEBVRE  
Professor - Aix-Marseille University, Faculty of Economics and Management  
Research themes: Labour economics, Public economics
Appendices

PhD: 2009, University of Liège

Michel LUBRANO
Emeritus research professor - CNRS
Research themes: Econometrics, Public economics, Social choice
PhD: 1986, University of Liège

Stéphane LUCHINI
Research fellow - CNRS
Research themes: Behavioral and experimental economics, Econometrics, Environmental economics
PhD: 2000, Aix-Marseille University

Brice MAGDALOU
Professor - University of Montpellier, CEE-M
Research themes: Behavioral and experimental economics, Social choice
PhD: 2006, University of Montpellier

Hervé MAGNOULOUX
Assistant professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Economic philosophy
PhD: 1993, Aix-Marseille University

Vélayoudom MARIMOUTOU
Professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Econometrics, Finance

Pierre MICHEL
Assistant professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Econometrics
PhD: 2016, Aix-Marseille University

Eva MORENO GALBIS
Professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Labour economics
PhD: 2004, Université Catholique de Louvain

Christophe MULLER
Professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Development economics, Econometrics, Public economics
PhD: 1993, Paris School of Economics (EHESS)

Sandra PALMERO
Assistant professor - Aix-Marseille University, Faculty of Economics and Management

Alain PARAPONARIS
Professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Health economics
PhD: 1998, École des hautes études en sciences sociales

Thierry PAUL
Professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: International economics and economic geography

Patrick PINTUS
Professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Macroeconomics
PhD: 1997, École des hautes études en sciences sociales

Céline POILLY
Professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Macroeconomics
PhD: 2008, University of Cergy-Pontoise

Costin PROTOPOPESCU
Assistant professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Econometrics, Environmental economics, Finance
PhD: 1997, University of Toulouse I

Eva RAIBER
Tenure track - Aix-Marseille University, Faculty of Economics and Management
Research themes: Behavioral and experimental economics, Development economics
PhD: 2019, Toulouse School of Economics

Lorenzo ROTUNNO
Professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Development economics, International economics and economic geography
PhD: 2013, The Graduate Institute of International and Development Studies
Frédéric RYCHEN  
Assistant professor - Aix-Marseille University, Faculty of Economics and Management  
Research themes: Environmental economics, Industrial organization, Public economics  
PhD: 1998, Aix-Marseille University

Marc SANGNIER  
Professor - Aix-Marseille University, Faculty of Economics and Management  
AMSE PhD program manager  
Research themes: Public economics  
PhD: 2012, Paris School of Economics (EHESS)

Christian SCHLUTER  
Professor - Aix-Marseille University, Faculty of Economics and Management  
Research themes: Development economics, Econometrics, Labour economics  
PhD: 1997, London School of Economics

Thomas SEEGMULLER  
Research professor - CNRS  
AMSE deputy director  
Research themes: Environmental economics, Macroeconomics  
PhD: 2001, University Louis Pasteur  
Editorial activities: Associate editor of International Journal of Economic Theory

Avner SEROR  
Tenure track - Aix-Marseille University, Faculty of Economics and Management  
Research themes: Development economics  
PhD: 2018, Paris School of Economics - Paris 1

Patrick SEVESTRE  
Professor - Aix-Marseille University, Faculty of Economics and Management  
Research themes: Applied microeconometrics  
PhD: 1984, University Paris 1 Panthéon-Sorbonne

Antoine SOUBEYRAN  
Emeritus professor - Aix-Marseille University, Faculty of Economics and Management  
Research themes: Behavioral and experimental economics, Industrial organization  
PhD: 1975, Aix-Marseille University

Hubert STAHN  
Professor - Aix-Marseille University, Faculty of Economics and Management

Research themes: Environmental economics, Game theory and social networks, Public economics  
PhD: 1991, University Louis Pasteur

Miriam TESCHL  
Assistant professor - EHESS  
Research themes: Economic philosophy

Agnes TOMINI  
Research fellow - CNRS  
Research themes: Environmental economics, Public economics  
PhD: 2009, Aix-Marseille University

Gilbert TOSI  
Assistant professor - Aix-Marseille University, Faculty of Economics and Management  
Research themes: Economic philosophy  
PhD: 1983, Aix-Marseille University

Alain TRANNOY  
Research professor - EHESS  
Research themes: Economic philosophy, Public economics, Social choice  
PhD: 1987, University of Rennes  
Editorial activities: Associate editor of Journal of Economic Inequality

Federico TRIONFETTI  
Professor - Aix-Marseille University, Faculty of Economics and Management  
AMSE recruiting manager  
Research themes: International economics and economic geography  
PhD: 1996, The Graduate Institute of International and Development Studies

Tanguy van YPERSELE  
Professor - Aix-Marseille University, Faculty of Economics and Management  
AMSE deputy director and director of the graduate school  
Research themes: International economics and economic geography, Public economics  
PhD: 1996, Université Catholique de Louvain

Alain VENDITTI  
Research professor - CNRS  
AMSE director  
Research themes: Macroeconomics  
PhD: 1994, Aix-Marseille University

Aix-Marseille School of Economics  57
Editorial activities: Member of the editorial board of Revue d’Economie Politique, International Journal of Economic Theory, Portuguese Economic Journal

Bruno VENTELOU
Research professor - CNRS
Research themes: Health economics, Macroeconomics
PhD: 1995, Paris School of Economics (EHESS)

Roberta ZIPARO
Assistant professor - Aix-Marseille University, Faculty of Economics and Management
Research themes: Development economics, Health economics, Labour economics
PhD: 2013, University of Namur

PhD students (62)

“Classic” PhD track

Ulrich AIOUNOU, 1st year
“Heterogeneity, non-linearity and variable selection in econometric models: Three essays”
Under the direction of Gilles DUFRÉNOT and Emmanuel FLACHAIRE

Claire ALESTRA, 4th year
“Evaluation of the Public Policies of the Energy and Environmental Transition”
Under the direction of Olivier CHANEL and Sarah FLÈCHE

Bakhtawar ALI, 1st year
“Essays on Legal Institutions and Development”
Under the direction of Marc SANGNIER and Avner SEROR

Anastasiia ANTONOVA, 2nd year
“Information, beliefs and macroeconomy”
Under the direction of Céline POILLY

Daniela ARLIA, 4th year
“Essays on local housing and labor markets”
Under the direction of Alain TRANNOY

Johanne BACHERON, 3rd year
“Gender inequalities in the labour market: Occupational segregation, sexual harassment and paternity leave”
Under the direction of Eva MORENO GALBIS and Lorenzo ROTUNNO

Guillaume BATAILLE, 2nd year
“Three essays on the economic analysis of interacting natural resources”
Under the direction of Hubert STAHN and Agnes TOMINI

Dallal BENDJELLAL, 5th year
“Sovereign risk, credit spreads and financial intermediation”
Under the direction of Aurélien EYQUEM and Céline POILLY

Tizzi BENE, 4th year
“Analysis of interactions between formal insurance and informal risk-sharing institutions: A network-based approach”
Under the direction of Yann BRAMOULLÉ and Frédéric DEROIAN

Aliénor BISANTIS, 1st year
“The Determinants of the Gender Output Gap in Research”
Under the direction of Yann BRAMOULLÉ and Roberta ZIPARO

Anushka CHAWLA, 5th year
“Marriage markets and social networks”
Under the direction of Yann BRAMOULLÉ and Cecilia GARCIA-PEÑALOSA

Laura Daniela CONTRERAS PORTELA, 1st year
“The consequences of Spatial Policies: theory and empirical evidence”
Under the direction of Lorenzo ROTUNNO and Federico TRIONFETTI

Marion COSTE, 4th year
“Chronic Hepatitis B in rural Senegal, an application of the health capability paradigm”
Under the direction of Mohammad ABU-ZAINEH and Sylvie BOYER

Kenza ELASS, 4th year
“Supply side effects on gender wage inequality”
Under the direction of Cecilia GARCIA-PEÑALOSA and Christian SCHLUMER

Nicolas GALLO, 3rd year
“Ethnic disparities among the youth in the context of the opioid crisis in the United States”
Under the direction of Habiba DJEBBARI

Tom GARGANI, 1st year
“Inequality measurement of ordinal variables”
Under the direction of Nicolas GRAVEL

Lucie GIORGI, 1st year
“Three essays in the economics of the family”
Under the direction of Habiba DJEBBARI and Eva RAIBER

Federico GONZALEZ ETCHEBHERE, 2nd year
“With a little help of my...welfare state: a model of the political economy of inequality with social mobility via redistribution and (miss)information”
Under the direction of Nicolas GRAVEL and Alain TRANNOY

Florian GUIBELIN, 5th year
“Universal basic income: A theoretical analysis in an economic framework”
Under the direction of Alain TRANNOY

Ricardo GUZMAN, 1st year
“Trade, distortions and structural transformation”
Under the direction of Lorenzo ROTUNNO and Federico TRIONFETTI

Gilles HACHEME, 4th year
“Analyzing markets with online data: mixing machine learning and econometrics”
Under the direction of Bruno DECREUSE and Emmanuel FLACHAIRE

Camille HAINNAUX, 3rd year
“Environmental tax reforms under heterogeneity”
Under the direction of Thomas SEEGMULLER

Nastasia HENRY, 1st year
“Unconventional policies in effectiveness quest”
Under the direction of Céline GIMET and Alain VENDITTI

Daniela HORTA SÁENZ, 3rd year
“Essays on shocks and economic behavior”
Under the direction of Timothée DEMONT and Tanguy VAN YPERSELE

Suzanna KHALIFA, 5th year
“Violence envers les femmes dans les pays en développement”
Under the direction of Patricia AUGIER and Marion DOVIS

Natalia Andrea LABRADOR BERNATE, 1st year
“Gender differences in Risk-taking”
Under the direction of Habiba DJEBBARI

Antoine LACOMBE, 1st year
“An understanding of willingness to test for several diseases using behavioral economics tools”
Under the direction of Sylvie BOYER and Bruno VENETLOU

Mélina LONDON, 4th year
“Assessing firms’ vulnerabilities: Accounting for network effects”
Under the direction of Patrick PINTUS
Santiago LOPEZ, 3rd year
“Essays on intergenerational public policies”
Under the direction of Renaud BOURLÈS and Alain TRANNOY

Kohmei MAKIHARA, 2nd year
“Public Goods Game on Networks with Endogenous Preferences”
Under the direction of Sebastian BERVOETS and Mathieu FAURE

Mykhailo MATVIEIEV, 3rd year
“Essays on Income Risks and Heterogeneous Agents”
Under the direction of Céline POILLY

Karine MOUKADDEM, 2nd year
“The Role of Traditional Social Norms in Determining Women’s and Children’s Well-being in the Middle East North African Countries”
Under the direction of Patricia AUGIER and Marion DOVIS

Nandeeta NEERUNJUN, 4th year
“Intermittent renewables and energy transition”
Under the direction of Jean-Henry FERRASSE and Hubert STAHN

Andrea Carolina PÉREZ USECHE, 6th year
“Are households formation processes inherently assortative?”
Under the direction of Nicolas GRAVEL and Roberta ZIPARO

Fabien PETIT, 4th year
“Essays on inter-generational dynamics in Economics”
Under the direction of Cecilia GARCIA-PEÑALOSA and Marc SANGNIER

Julieta PEVERI, 4th year
“Political selection and quality of governance”
Under the direction of Nicolas BERMAN and Marc SANGNIER

Bertille PICARD, 4th year
“Machine learning and aggregation for causal inference”
Under the direction of Emmanuel FLACHAIRE

Jade PONSARD, 3rd year
“Human capital in the US: Evidence from three quasi-natural experiments”
Under the direction of Clément BOSQUET and Federico TRIONFETTI

Anne-Kim RISTORI, 4th year
“Empirical contributions to the choice of complementary health insurance under bounded rationality”
Under the direction of Alain PARAPONARIS

Maria SAKHAROVA, 1st year
“Essays on Development in Late Tsarist Russia”
Under the direction of Cecilia GARCIA-PEÑALOSA

Aisha SALIH, 2nd year
“Agricultural Production Under Climate Uncertainty: Modeling and Policy Applications”
Under the direction of Timothée DEMONT and Habiba DJEBBARI

Rosnel SESSINOU, 4th year
“Precise estimation and inference in large models”
Under the direction of SÉBASTIEN LAURENT

Matteo SESTITO, 4th year
“Essays on economic history”
Under the direction of Nicolás BERMAN and Marc SANGNIER

Mathias SILVA VAZQUEZ, 4th year
“Dynamics of the Global Income Distribution and its Determinants in Recent Decades”
Under the direction of Stephen BAZEN

Valentin TISSOT, 3rd year
“Study of the determinants of educational and professional achievement”
Under the direction of Bruno DECREUSE and Sarah FLÈCHE

Ernesto UGOLINI, 2nd year
“Feeding populism”
Under the direction of Renaud BOURLÈS and Lorenzo ROTUNNO

Carolina ULLOA SUAREZ, 4th year
“Budgetary and distributional implications of fiscal policy rules”
Under the direction of Gilles DUFRÉNOT
Elie VIDAL-NAQUET, 4th year
“Spatial search with worker heterogeneity”
Under the direction of Christian SCHLUTER

Nathan VIEIRA, 2nd year
“Between distortions and flexibility: when and why short-time work policies are efficient?”
Under the direction of Bruno DECREUSE

Sarah VINCENT, 4th year
“Female entrepreneurship in developing countries”
Under the direction of Renaud BOURLÈS and Roberta ZIPARO
Anna ZAYTSEVA, 4th year
“Healthcare supply shortage, inequalities in access and healthcare quality: Towards new forms of practices organization for French family physicians”
Under the direction of Bruno VENTELOU and Pierre VERGER

“On the job” PhD track

Baptiste MEUNIER, 3rd year - ‘On the job’
“Comment les données alternatives et les techniques de la science de données peuvent contribuer à l’analyse et à la prévision économique ?”
Under the direction of Sébastien LAURENT

Babacar SAMBE, 3rd year - ‘On the job’
“The determinants of PPP and their impact on economic growth in UEMOA”
Under the direction of Gilles DUFRÉNOT

Matteo SANTANGELO RAVA, 1st year - ‘On the job’
“Can we use behavioral science to increase human capital investment and speed up the fight against poverty?”
Under the direction of Habiba DJEBBARI

Naël SHEHADÉH, 4th year - ‘On the job’
“Essays in Empirical and Sustainable Banking”
Under the direction of Gilles DUFRÉNOT and Christelle LECOURT

Julien SILHOL, 4th year - ‘On the job’
“Concurrence, tarification et choix d’activité des médecins généralistes libéraux”
Under the direction of Alain PARAPONARIS and Bruno VENTELOU

“One-year grants for 4th or 5th year candidates”

Lydia ASSOUAD, 4th year PhD fellowship student - Paris School of Economics
“Essays on the political economy of development of the Middle East”
Under the direction of Thomas PIKETTY and Ekaterina ZHURAVSKAYA - AMSE tutor: Avner SEROR

Samuel DELPEUCH, 4th year PhD fellowship student - SciencesPo
“Essays on globalization and multinational firms”
Under the direction of Thierry MAYER - AMSE tutor: Tanguy VAN YPERSELE

Francesco Saverio GAUDIO, 4th year PhD fellowship student - Warwick University
“On the Macro-Financial Implications of Limited Participation in Asset Markets”
Under the direction of Ivan PETRELLA and Shaun VAHEY - AMSE tutor: Frédéric DUFOURT

Morten STØSTAD, 4th year PhD fellowship student - Paris School of Economics
“Inequality as an Externality”
Under the direction of Marc FLEURBAEY and Claudia SENIK - AMSE tutor: Mathieu LEFEBVRE

Zheng WANG, 4th year PhD fellowship student - European University Institute
“Essays in the economics and econometrics of peer effects”
Under the direction of Sule ALAN and Andrea ICHINO - AMSE tutor: Yann BRAMOULLE

Eddy ZANOUTENE, 4th year PhD fellowship student - Université Paris II Panthéon-Assas
“Evaluation of French Reforms on Capital Taxation”
Under the direction of Etienne LEHMANN - AMSE tutor: Alain TRANNOY

Post-doctoral fellows (16)

Georgios ANGELIS, since 2020
Research themes: Behavioral economics, Macroeconomics, Monetary economics
PhD: 2020, Brown University
“Essays in monetary economics” - Under the direction of Gauti Eggertsson

Neha DEOPA, since 2021
Research themes: Development economics, Environmental economics
PhD: 2021, Geneva Graduate Institute (The Graduate Institute of International and Development Studies)
“Essays in Uncertain Economics” - Under the direction of Ugo Panizza

Andreas DIBIASI, since 2021
Research theme: Applied macroeconomics, Econometrics
PhD: 2018, ETH Zürich
“The Macroeconomics of Uncertainty” - Under the direction of Klaus Abberger, Jan-Egbert Sturm

Alberto GRILLO, since 2020
Research themes: Political economy, Public economics
PhD: 2020, Toulouse School of Economics
“Essays in political economics: On the determinants and patterns of voter turnout” - Under the direction of Philippe De Donder

Jan-Luca HENNIG, since 2021
Research themes: Labour economics, Macroeconomics
PhD: 2020, Trinity College Dublin
“Essays in Macro and Labor Economics” - Under the direction of Fadi Hassan, Davide Romelli

Sullivan HUE, since 2021
Research themes: Econometrics, Finance
PhD: 2020, Laboratoire d’Economie d’Orléans
“Four Essays on Financial Risk Measurement” - Under the direction of Elena Dumitrescu, Sessi Tokpavi

Phoebe W. ISHAK, since 2021
Research themes: Development economics, Gender and Political Economy, Labour economics
PhD: 2020, Universität Hamburg
“Essays in the Economics of the Oil Resource Curse”

Hélène Le FORNER, 2019–2021
Research themes: Economics of education, Family economics, Labour economics, Public economics
PhD: 2019, Université Panthéon Sorbonne and Paris School of Economics
“Human capital inequalities: Family structure matters” - Under the direction of Hippolyte D’Albis, Arnaud Lefranc

Vladimir PECHEU, since 2020
Research themes: Industrial organization, Labour economics, Personnel economics, Theory
PhD: 2020, University of California, Los Angeles
“Essays on the usage of profit sharing by firms” - Under the direction of Maurizio Mazzocco

Eric Roca FERNANDEZ, 2018–2021
Research themes: Comparative development, Economic history, Family economics, Gender economics
PhD: 2018, Université Catholique de Louvain
“Three essays on economic development and gender” - Under the direction of Fabio Mariani, Luca Pensieroso

Sofia RUIZ, since 2021
Research themes: Game theory and social networks, Labour economics
PhD: 2021, University of the Basque Country
“Diffusion and Games in Social and Economic Networks” - Under the direction of María Paz Espinosa Alejos, Jaromír Kovářík

Shahir SAFI, 2018–2021
Research themes: Game theory and social networks, Labour economics
PhD: 2018, Universitat Autonoma de Barcelona
“Essays on networks, social ties, and labor markets” - Under the direction of Salvador Barberà, Tomás Rodríguez Barraquer

Manuel STAAB, since 2020
Research themes: Behavioral economics, Economics of networks, Game theory, Mechanism design
PhD: 2018, London School of Economics
“Essays on peer effects in social groups and information misperception” - Under the direction of Francesco Nava and Balázs Szentes

Yevgeny TSODIKOVICH, since 2019
Research themes: Asynchronous decision making, Decision theory, Game theory, Political and
behavioural economics
PhD: 2019, Tel Aviv University
“Dynamic decision making with long-term binding actions” - Under the direction of Ehud Lehrer

Priyam VERMA, since 2021
Research themes: Finance, International economics and economic geography
PhD: 2021, University of Houston
“Optimal Infrastructure after Trade Reform in India” - Under the direction of Kei-Mu Yi

Ahmed YOUSUF, since 2021
Research themes: Development economics, International economics and economic geography
PhD: 2021, University of Arkansas
“Essays on the application of spatial econometrics in the study of conflict and economic activity” - Under the direction of Andrea Civelli, Hyunseok Jung, Raja Kali

Visiting and mobility
Researchers and post-doctoral fellows visited AMSE researchers

Mihir BHATTACHARYA, Ashoka University
June 2022

Joel CARIOLLE, FERDI
November to December 2022

Fabio CERINA, University of Cagliari
January to April 2022

Donald DAVIS, Columbia University
October 2022

Rajeev DEHEJIA, New York University
June to July 2022

João Carlos de OLIVEIRA SOUZA, Federal University of Piauí
March 2022 to February 2023

Vera EICHENAUER, Swiss Economic Institute KOF, ETH Zurich
September 2021 to August 2022

Garance GENICOT, Georgetown University
June to July 2022

Sanjeev GOYAL, Cambridge University and NYU Abu Dhabi
June 2022

Catherine GUIRKINGER, University of Namur
July 2022

Fanny HENRIET, Paris School of Economics
September 2022 to December 2023

Yulin HSWEN, University of California San Francisco
September 2021 to December 2022
Aurélia LEPINE, University College London (UCL)  September 2021 to June 2022

Olivier L’HARIDON, Université of Rennes 1  July 2022

Jakob MADSEN, Monash University  June to July 2022

Sultan MEHMOOD, New Economic School in Moscow  October to December 2022

Morgan RAUX, University of Luxembourg  February to July 2022

Federico REVELLI, University of Turin  May to June 2022

Harutaka TAKAHASHI, Kobe University and Meiji Gakuin University  September 2022 to February 2023

AMSE researchers invited co-authors

Philippe BERTRAND  
Jean-Luc Prigent, CY Cergy Paris Université  March 29 to 31, 2022

Nathalie FERRIERE  
Rozenn Hotte, Université de Tours  May 11 to 19, 2022

Ewen GALLIC  
Cedric Crofils, Université Paris Dauphine-PSL, France Stratégie  April 4 to May 8, 2022

Badih GHATTAS  
Mathias Bourel, Universidad de la República  October 6 to 10, 2022

Mathieu LEFEBVRE  
Pierre Pestieau, Université Catholique de Louvain  February 28 to March 4, 2022

AMSE researchers, PhD students and post-doctoral fellows visited co-authors

Kenza ELASS  
Roland Rathelot, CREST/ENSAE and Dominique Meurs, PSE  April 11 to 15, 2022 and April 28 to May 13, 2022

Cecilia GARCIA-PEÑALOSA  
Pedro Mira, CEMFI, Frank Portier, University College London and Oded Galor, Brown University  January 12 to December 15, 2022

Stéphane LUCHINI  
Pedro Vicente, Nova School of Business and Economics  October 1, 2021 to June 30, 2022

Nandeeta NEERUNJUN  
Julien Xavier Daubanes, University of Geneva  April 15 to May 15, 2022

Federico TRIONFETTI  
Giuseppe De Arcangelis, Sapienza University of Rome  March 29 to April 29, 2022

Elie VIDAL-NAQUET  
Jos van Ommeren, Vrije Universiteit Amsterdam  August 22 to September 30, 2022

Sarah VINCENT  
Centre des Sciences Humaines, New Delhi  January 2 to February 18, 2022

AMSE PhD long visits (more than 2 months)

Daniela ARLIA  
Gilles Duranton, University of Pennsylvania  August 29 to December 3, 2022

Mykhailo MATVIEIEV  
Edouard Challe, European University Institute  March 1 to May 31, 2022

Bertille PICARD  
Arthur Charpentier, Université du Québec à Montréal  January 5 to June 30, 2022
Matteo Sestito
Ruben Durante, Pompeu Fabra University of Barcelona
October 2021 to January 2022

Mathias Silva Vasquez
Jesus Crespo Xcuaresma, WU Vienna
March 1 to May 31, 2022

Carolina Ulloa Suarez
Ugo Panizza, Graduate Institute of International and Development Studies
April 18 to June 18, 2022

Sarah Vincent
Siwan Anderson, University of British Colombia
September 20 to December 20, 2022

PhD students from other universities visited AMSE for periods ranging from a month to the full academic year

Patrick Allmis, University of Antwerp
February to August 2022

Marie Beigelman, University of Barcelona
February-March 2022

Adrian Bidlingmaier, Konstanz University
September 2022

Sina Chen, Konstanz University
November 2022

Mark Kapteina, University of Konstanz
March 2022

Thies Niemeier, University of Konstanz
March to April, 2022

Leo Reitzmann, Paris School of Economics
November 2022 to January 2023

Florian Roser, Konstanz University
May to July, 2022

Annika Schürle, University of Konstanz
March 2022

Livia Shkoza, University of Konstanz
March 2022

Mohamed Siala, Sfax University
April to July, 2022

Zheng Wang, European University Institute
September 2022 to August 2023

Conferences and workshops (8)

DeMUr Workshop - DEcision Making under Uncertainty
Organized by Andreas DIBIASI and Céline POILLY
May 19-20, 2022
The DEMUR workshop is organized against the background of the ANR research project on uncertainty and risk in macroeconomic, details available here. The aim of this workshop is to bring together researchers working on those topics in order to present and discuss their ongoing research.
32 participants
Speakers:
- Efrem CASTELNUOVO, University of Padova
- Laurent FERRARA, SKEMA
- Luca GAMBETTI, Universitat Autonoma de Barcelona
- Niko HAUZENBERGER, University of Salzburg
- Keith KUESTER, Goethe University, University of Bonn
21st Journées Louis-André Gérard-Varet - LAGV 2022
Organized by Charles FIGUIÈRES
June 6-8, 2022
LAGV is one of the most important yearly conference in public economics in Europe. It aims to promote and diffuse high-quality research, with a special emphasis on articles that shed light on 'real world' policy making.
274 participants
Keynote speakers:
- Myrna WOODERS, Vanderbilt University, College of Arts and Science
- Rabah AMIR, University of Iowa, Tippie College of Business
- Marc FLEURBAEY, Paris School of Economics, CNRS

International Conference on Public Economic Theory - PET 2022
Organized by Myrna WOODERS (Vanderbilt University), Rabah AMIR (University of Iowa) and Charles FIGUIÈRES
June 8-10, 2022
286 participants
Keynote speaker:
- Glenn C. LOURY, Brown University
Semi-plenaries speakers:
- Helmuth CREMER, Toulouse School of Economics
- Hulya ERASLAN, Rice University
- Françoise FORGES, Université Paris-Dauphine
- Sanjeev GOYAL, University of Cambridge
- Nikos NIKIFORAKIS, New York University Abu Dhabi
- Karine NYBORG, University of Oslo
- Edward SCHLEE, Arizona State University
- Xavier VIVES, University of Navarra, IESE Business School

Workshop AMSE - BANQUE DE FRANCE
Organized by Antoine BERTHOU (Banque de France) and Céline POILLY
June 24, 2022
21 participants
Speakers:
- Nuno COIMBRA, Banque de France
- Meredith CROWLEY, University of Cambridge
- Andreas DIBIASI, Aix-Marseille Université, ÂMSE
- Franck PORTIER, University College London
- Morten RAVN, University College London
- Federica ROMEI, University of Oxford

The 2022 French Stata conference in applied econometrics
Organized by Sébastien LAURENT, Mathieu LEFEBVRE and Timberlake Consultants
June 30-July 1, 2022
The conference aims to welcome quality research in applied econometrics from all fields using Stata to perform their analysis. It will not be focused on the presentations of user-developed commands but will offer the opportunity to present applied works developed in Stata.
44 participants
Keynote speakers:
- Xavier D’HAULTFOEUILLE, CREST-ENSAE
- Jeffrey WOOLDRIDGE, Michigan State University
Conference “Challenging Inequalities”
Organized by Nicolas GRAVEL and Brice MAGDALOU (University of Montpellier)
September 14-16, 2022
Partners: Agence Nationale de la Recherche, Centre for Social Sciences and Humanities, Economic and Social Research Council, Indian Council of Social Science Research, The Research Council of Norway

40 participants
Speakers:
- Francesco ANDREOLI, University of Verona
- Gaëlle AYMERIC, University of Montpellier
- Apurav BHATIYA, University of Birmingham
- Stephen BAZEN, Aix-Marseille Université, AMSE
- Grace CARSWELL, University of Sussex
- Alain CHATEAUNEUF, PSE-Ecole d’économie de Paris
- Geert DE NEVE, University of Sussex
- Mathieu FAURE, Aix-Marseille Université, AMSE
- Emmanuel FLACHAIRE, Aix-Marseille Université, AMSE
- Véronique GILLE, DIAL-IRD
- Venkatasubramanian GOVINDAN, Institut Français de Pondicherry
- Nicolas GRAVEL, Aix-Marseille Université, AMSE
- Markus JÄNTTI, Stockholm University
- Stephen JENKINS, LSE
- Anders Grøn KJELSRUD, University of Oslo
- Tista KUNDU, CSH New Delhi
- Olivier L’HARIDON, Université de Rennes 1
- Jo Thori LIND, University of Oslo
- Brice MAGDALOU, University of Montpellier, Center for Environmental Economics
- Jean-Thomas MARTELLI, International Institute for Asian Studies, Leiden University
- Karl Ove MOENE, University of Oslo
- Arnaud NATAL, University of Bordeaux, GREThA
- Christophe Jalil NORDMAN, IRD, IFP, DIAL
- Vito PERAGINE, University of Bari
- Rohini SOMANATHAN, Delhi School of Economics
- Benoît TARROUX, Université Lumière Lyon 2, GATE
- Alain TRANNOY, Aix-Marseille Université, EHESS, AMSE

Tribute in honor of Gilbert Cette
Organized by Alain TRANNOY
November 10, 2022
29 participants
Speakers:
- Philippe AGHION, Collège de France, INSEAD, London School of Economics
- Stephen BAZEN, Aix-Marseille Université, AMSE
- Renaud BOURLÉS, Centrale Marseille, AMSE
- Hélène COUPIE, Aix-MarseilleUniversité, LEST
- Bruno DECREASE, Aix-Marseille Université, AMSE
- Dominique HENRIET, Centrale Marseille, AMSE
- Rémy LECAT, Banque de France
- Jimmy LOPEZ, Université de Bourgogne, Laboratoire d’économie de Dijon
- Jacques MAIRESSE, Enseae ParisTech
- Franck PETIT, Aix-Marseille Université, Centre de droit social
- Alain TRANNOY, EHESS, AMSE
Food for Thought

Science is organized knowledge. Wisdom is organized life.

Emmanuel Kant
